# H.pylori Antigen in stools

- **Quantitative microELISA**
  - Highly specific monoclonal antibodies
  - Extraction device for easy clean-up of the sample
  - High correlation with the severity of the illness by detecting live organisms
  - Suitable for the follow-up of eradication therapy
- **Rapid test**
  - Easy to handle lateral flow device
  - Suitable for point of care and small labs

# H.pylori Antibodies microELISA

- **H.pylori**
  - IgG&IgA&IgM antibodies detection
  - Quantitative assays
  - Suitable for the serological follow-up of infected patients
- **H.pylori CagA**
  - Quantitative IgA determination
  - High correlation with the severity of the illness
