

MALARIA & WEST NILE

**Life-threatening infections are spreading
in developed countries where previously were not present.**

**Early diagnosis of these new infections are becoming
essential by treating the patient with specific
therapeutics in order to prevent pandemic outbreaks.**

Dia.Pro ELISA for the determination of antibodies are all based on recombinant antigens to provide the assay with the best specificity and sensitivity.

The kit configuration allows the assay to be fully automated in ELISA workstations as well as the blood screening dedicated DIA.BLOod instrument.

CODE	NAME
WNAB.CE	West Nile Virus antibodies
MALAB.CE	Plasmodium sp. antibodies
